- Caregiver will be able to identify key components of stroke care according to best practice.
- Caregiver will be able to discuss the stroke chain of survival utilization, current standards and order sets at Mosaic Life Care.
- Caregiver will identify small and large vessel ischemic strokes while identifying current treatment options.
- Caregiver will be able to discuss key components of rehabilitation care after a stroke.
- Caregiver will be able to identify inclusion/exclusion criteria for TPA.

The Average Human has 100 Billion Brain Cells

In each minute, 1.9 million neurons, 14 billion synapses and 12 km (7.5 miles) of myelinated fibers are destroyed. Compared with the normal rate of neuron loss in brain aging, the ischemic brain ages 3.6 years each hour without treatment.

Registration is Free

Mosaic Life Care caregivers: please register through myPath, located on Connected. Once in myPath, search for Stroke Consortium.

External Registrants: Please register using the following link: myMosaicLifeCare.org/myPath
